

## SAFETY DATA SHEET

## Armourglow

According to the Preparation of Safety Data Sheets for Hazardous Chemicals Code of Practise, 2021.

SECTION 1: Identification: Product identifier and chemical identity		
Product identifier		
Product name	Armourglow	
Relevant identified uses of the	substance or mixture and uses advised against	
Application	Car maintenance product Dressing	
Uses advised against	For professional use only. This product is not recommended for any industrial, professional or consumer use other than the Identified uses above.	
Details of the supplier of the sa	fety data sheet	
Supplier	Autosmart Australia 11 Darrambal Close Rathmines NSW 2283 Australia www.autosmartaustralia.com.au Tel: 02 49 75 14 88 (Mon to Fri, 08:00 - 16:00 AEST) (General Information. Transport Information. Mild Medical Information) autosmart@autosmartaustralia.com.au	
Contact Person	Mr. Russell Butler	
Emergency telephone number		
Emergency telephone	NCEC - For Chemical Emergency Support ONLY (spill, leak, fire, exposure or accident), Call NCEC at 18000 74234 (toll free 24Hrs) - when calling please quote "AUTOSMART 29003- NCEC" Local number +61 2 8 014 4558 General Information. Transport Information. Mild medical Information:- Tel: 02 49 75 14 88 (Mon to Fri, 08:00 - 16:00 AEST)	
National emergency telephone number	Poison Information Hotline: 13 11 26	
SECTION 2: Hazard(s) identification		

# Classification of the substance or mixturePhysical hazardsNot ClassifiedHealth hazardsNot ClassifiedEnvironmental hazardsNot ClassifiedLabel elementsNC Not Classified

Precautionary statements	P280 Wear protective gloves. P280 Wear eye protection. P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. P501 Dispose of contents/ container in accordance with local regulations.
Supplemental label information	For professional users only.

## Other hazards

This product does not contain any substances classified as PBT (persistent, bioaccumulative and toxic) or vPvB (very persistent and very bioaccumulative).

SECTION 3: Co	mposition and	l information o	on ingredients

#### Mixtures

#### Poly(oxy-1,2-ethanediyl), α-tridecyl-ω-hydroxy-, branched

1<1.25%

CAS number: 69011-36-5

## Classification Skin Irrit. 2 - H315

Eye Irrit. 2A - H319 Aquatic Acute 2 - H401

The full text for all hazard statements is displayed in Section 16.

SECTION 4: First aid measures		
Description of first aid measures		
General information	Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.	
Inhalation	Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.	
Ingestion	Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an unconscious person. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Place unconscious person on their side in the recovery position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing such as collar, tie or belt.	
Skin Contact	It is important to remove the substance from the skin immediately. In the event of any sensitisation symptoms developing, ensure further exposure is avoided. Remove contamination with soap and water or recognised skin cleansing agent. Get medical attention if symptoms are severe or persist after washing.	
Eye contact	Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.	

Most important symptoms and effects, both acute and delayed         General information       See Section 11 for additional information on health hazards. The severity of the symptoms a described will vary dependent on the concentration and the length of exposure.         Inhalation       Prolonged inhalation of high concentrations may damage respiratory system.         Ingestion       May cause sensitisation or allergic reactions in sensitive individuals. Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.         Skin contact       May cause skin sensitisation or allergic reactions in sensitive individuals. Prolonged contact may cause dryness of the skin.         Eye contact       Initiating to eyes.         Indication of any immediate medical attention and special treatment needed         Notes for the doctor       Treat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.         Specific treatments       No special treatment required.         Suitable extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Specific hazards       Containers can burst violently or explode when heated, due to excessive pressure build-up.         Hazardous combustion       Thermal decomposition or comb
described will vary dependent on the concentration and the length of exposure.InhalationProlonged inhalation of high concentrations may damage respiratory system.IngestionMay cause sensitisation or allergic reactions in sensitive individuals. Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.Skin contactMay cause skin sensitisation or allergic reactions in sensitive individuals. Prolonged contact may cause dryness of the skin.Eye contactIrritating to eyes.Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Specific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
IngestionMay cause sensitisation or allergic reactions in sensitive individuals. Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.Skin contactMay cause skin sensitisation or allergic reactions in sensitive individuals. Prolonged contact may cause dryness of the skin.Eye contactIrritating to eyes.Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting mediaNo special treatment required.Suitable extinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsultable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Special hazards arising from the substance or mixtureSpecial hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Skin contactSymptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.Skin contactMay cause skin sensitisation or allergic reactions in sensitive individuals. Prolonged contact may cause dryness of the skin.Eye contactInritating to eyes.Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Specific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion products may include the following substances: Harmful gases or vapours.
may cause dryness of the skin.Eye contactIrritating to eyes.Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting mediaSterrefighting mediaSuitable extinguishing mediaThe product is not flammable. Extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Specific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Indication of any immediate medical attention and special treatment neededNotes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting mediaSECTION 5: Firefighting mediaSuitable extinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Specific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Notes for the doctorTreat symptomatically. May cause sensitisation or allergic reactions in sensitive individuals.Specific treatmentsNo special treatment required.SECTION 5: Firefighting measuresExtinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Special hazards arising from the substance or mixtureSpecific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Specific treatments       No special treatment required.         SECTION 5: Firefighting measures         Extinguishing media         Suitable extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Special hazards arising from the substance or mixture       Specific hazards         Containers can burst violently or explode when heated, due to excessive pressure build-up.       Hazardous combustion products may include the following substances: Harmful gases or vapours.
SECTION 5: Firefighting measures         Extinguishing media         Suitable extinguishing media         Unsuitable extinguishing media         Do not use water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media         Special hazards arising from the substance or mixture         Specific hazards       Containers can burst violently or explode when heated, due to excessive pressure build-up.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Extinguishing media         Suitable extinguishing media       The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.         Unsuitable extinguishing media       Do not use water jet as an extinguisher, as this will spread the fire.         Special hazards arising from the substance or mixture       Specific hazards         Containers can burst violently or explode when heated, due to excessive pressure build-up.         Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Suitable extinguishing mediaThe product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Special hazards arising from the substance or mixtureContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.Unsuitable extinguishing mediaDo not use water jet as an extinguisher, as this will spread the fire.Special hazards arising from the substance or mixtureSpecific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.

Hazardous combustion products       Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Specific hazardsContainers can burst violently or explode when heated, due to excessive pressure build-up.Hazardous combustion productsThermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
Hazardous combustionThermal decomposition or combustion products may include the following substances:productsHarmful gases or vapours.
products Harmful gases or vapours.
Advice for firefighters
Protective actions during firefighting Avoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with water spray and remove them from the fire area if it can be done without risk. Cool containers exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use water spray to disperse vapours and protect men stopping the leak. Control run-off water by containing and keeping it out of sewers and watercourses. If risk of water pollution occurs, notify appropriate authorities.
Special protective equipment for firefighters       Wear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective clothing. Firefighter's clothing conforming to Australia/New Zealand Standards AS/NZS 4967 (for clothing) AS/NZS 1801 (for helmets), AS/NZS 4821 (for protective boots), AS/NZS 1801 (for protective gloves) will provide a basic level of protection for chemical incidents.         SECTION 6: Accidental release measures

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures

Personal precautions	No action shall be taken without appropriate training or involving any personal risk. Keep	
	unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material. Avoid contact with skin and eyes.	
Environmental precautions		
Environmental precautions	Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).	
Methods and material for conta	inment and cleaning up	
Methods for cleaning up	Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills immediately and dispose of waste safely. Approach the spillage from upwind. Small Spillages: If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area. Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and absorb spillage with sand, earth or other non-combustible material. Place waste in labelled, sealed containers. Clean contaminated objects and areas thoroughly, observing environmental regulations. The contaminated absorbent may pose the same hazard as the spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing with a spillage. Following dilution, discharge to the sewer with plenty of water may be permitted. The requirements of the local water authority must be complied with if contaminated water is flushed directly to the sewer. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.	
Reference to other sections		
Reference to other sections	For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.	
SECTION 7: Handling and stor	age, including how the chemical may be safely used	
Precautions for safe handling		
Usage precautions	Read and follow manufacturer's recommendations. Wear protective clothing as described in Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs. Handle all packages and containers carefully to minimise spills. Keep container tightly sealed when not in use. Avoid the formation of mists. Do not handle until all safety precautions have been read and understood. Do not handle broken packages without protective equipment. Do not reuse empty containers.	
Advice on general occupational hygiene	Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.	
Conditions for safe storage, including any incompatibilities		
Storage precautions	Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.	
Storage class	Chemical storage.	
Specific end use(s)		

Specific end use(s)	The identified uses for this product are detailed in Section 1.
SECTION 8: Exposure control	ols and personal protection
Ingredient comments	No exposure limits known for ingredient(s).
Exposure controls	
Protective equipment	
Appropriate engineering controls	Provide adequate ventilation. Personal, workplace environment or biological monitoring may be required to determine the effectiveness of the ventilation or other control measures and/or the necessity to use respiratory protective equipment. Use process enclosures, local exhaust ventilation or other engineering controls as the primary means to minimise worker exposure. Personal protective equipment should only be used if worker exposure cannot be controlled adequately by the engineering control measures. Ensure control measures are regularly inspected and maintained. Ensure operatives are trained to minimise exposure.
Eye/face protection	Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with Australia/New Zealand Standard AS/NZS 1337. Wear tight-fitting, chemical splash goggles or face shield. If inhalation hazards exist, a full-face respirator may be required instead.
Hand protection	Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. The breakthrough time for any glove material may be different for different glove manufacturers. To protect hands from chemicals, gloves should comply with Australia/New Zealand Standard AS/NZS 2161. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. The choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. When used with mixtures, the protection time of gloves cannot be accurately estimated. Gloves made from the following material may provide suitable chemical protection: Nitrile rubber. Thickness: >0.2mm The selected gloves should have a breakthrough time of at least 0.5 hours. Glove thickness is not necessarily a good measure of glove resistance as the permeation rate will depend on the exact glove composition. Repeated exposure to chemicals will degrade the ability of the glove to provide resistance to chemicals. Specific work environments and material handling practices may vary, therefore safety procedures should be developed for each intended application. Use thin cotton gloves inside natural rubber gloves if there is an allergy risk to natural rubber.
Other skin and body protection	Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.
Hygiene measures	Provide eyewash station and safety shower. Contaminated work clothing should not be allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment and the work area every day. Good personal hygiene procedures should be implemented. Wash at the end of each work shift and before eating, smoking and using the toilet. When using do not eat, drink or smoke. Preventive industrial medical examinations should be carried out. Warn cleaning personnel of any hazardous properties of the product.

Respiratory protection	Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and complies with Australia/New Zealand Standard AS/NZS 1716. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Full face mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Full face mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Half mask and quarter mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Half mask and quarter mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716.
Environmental exposure	Keep container tightly sealed when not in use.

	Volatile organic compound	This product contains a maximum VOC content of 0 g/litre.	
SECTION 10: Stability and reactivity			

Reactivity

There are no known reactivity hazards associated with this product.

Stability	Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.
Possibility of hazardous reactions	No potentially hazardous reactions known.
Conditions to avoid	There are no known conditions that are likely to result in a hazardous situation.
Materials to avoid	No specific material or group of materials is likely to react with the product to produce a hazardous situation.
Hazardous decomposition products	Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours.
SECTION 11: Toxicological int	formation
Information on toxicological eff	fects
Toxicological effects	Not regarded as a health hazard under current legislation.
Acute toxicity - oral Notes (oral LD₅₀)	Based on available data the classification criteria are not met.
Acute toxicity - dermal Notes (dermal LD <sub>50</sub> )	Based on available data the classification criteria are not met.
Acute toxicity - inhalation Notes (inhalation LC <sub>50</sub> )	Based on available data the classification criteria are not met.
Skin corrosion/irritation Animal data	Based on available data the classification criteria are not met.
Extreme pH	Moderate pH ( > 2 and < 11.5).
Serious eye damage/irritation Serious eye damage/irritation	Causes serious eye irritation.
Respiratory sensitisation Respiratory sensitisation	Based on available data the classification criteria are not met.
Skin sensitisation Skin sensitisation	May cause skin sensitisation or allergic reactions in sensitive individuals.
Germ cell mutagenicity Genotoxicity - in vitro	Based on available data the classification criteria are not met.
Carcinogenicity Carcinogenicity	Based on available data the classification criteria are not met.
IARC carcinogenicity	No component of this product present at levels greater than or equal to 0.1% is identified as probable, possible or confirmed human carcinogen by IARC.
Reproductive toxicity	
Reproductive toxicity - fertility	Based on available data the classification criteria are not met.
Reproductive toxicity - development	Based on available data the classification criteria are not met.
Specific target organ toxicity -	
STOT - single exposure	Not classified as a specific target organ toxicant after a single exposure.

Specific target organ toxicity - repeated exposure			
STOT - repeated exposure	Not classified as a specific target organ toxicant after repeated exposure.		
Aspiration hazard			
Aspiration hazard	Based on available data the classification criteria are not met.		
General information	The severity of the symptoms described will vary dependent on the concentration and the length of exposure.		
Inhalation	Prolonged inhalation of high concentrations may damage respiratory system.		
Ingestion	May cause sensitisation or allergic reactions in sensitive individuals. Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation.		
Skin Contact	May cause skin sensitisation or allergic reactions in sensitive individuals. Prolonged contact may cause dryness of the skin.		
Eye contact	Irritating to eyes.		
Route of exposure	Ingestion Inhalation Skin and/or eye contact		
Target Organs	No specific target organs known.		
Medical considerations	Skin disorders and allergies.		

Toxicological information on ingredients.

#### Poly(oxy-1,2-ethanediyl), $\alpha$ -tridecyl- $\omega$ -hydroxy-, branched

#### Acute toxicity - oral

ATE oral (mg/kg)

100.0

#### SECTION 12: Ecological information

Ecotoxicity	Not regarded as dangerous for the environment. However, large or frequent spills may have hazardous effects on the environment.	
Toxicity	Based on available data the classification criteria are not met.	
Persistence and degradability Persistence and degradability	The product is more than 80% biodegradable.	
Bioaccumulative potential		
Bioaccumulative Potential	No data available on bioaccumulation.	
Partition coefficient	Not available.	
<u>Mobility in soil</u> Mobility Other adverse effects	The product is water-soluble and may spread in water systems. The product is non-volatile.	
Other adverse effects	None known.	
SECTION 13: Disposal considerations Waste treatment methods		

General information	The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous.	
Disposal methods	Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible.	
SECTION 14: Transport information		
General	The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADG).	
UN number		

Not applicable.

#### UN proper shipping name

Not applicable.

#### Transport hazard class(es)

No transport warning sign required.

#### Packing group

Not applicable.

#### Environmental hazards

Environmentally hazardous substance/marine pollutant No.

#### Special precautions for user

Not applicable.

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

#### SECTION 15: Regulatory information

Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations	The Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP). National Code of Practice for the Preparation of Material Safety Data Sheets. Approved Criteria for Classifying Hazardous Substances. Exposure Standards for Atmospheric Contaminants in the Occupational Environment. Guidance Note on the Interpretation of Exposure Standards for Atmospheric Contaminants in the Occupational Environment. National Code of Practice for the Labelling of Workplace Substances. National Model Regulations for the Control of Workplace Hazardous Substances. National Code of Practice for the Control of Workplace Hazardous Substances. National Code of Practice for the Storage and Handling of Workplace Dangerous Goods. National Code of Practice for the Storage and Handling of Workplace Dangerous Goods. Guidance Note for Placarding Stores for Dangerous Goods and Specified Hazardous Substances. Guidance Note for the Assessment of Health Risks Arising from Hazardous Substances in the Workplace. National Standard for the Control of Major Hazard Facilities. National Code of Practice for the Control of Major Hazard Facilities.
Schedule (SUSMP)	No Poison Schedule number allocated

#### Inventories

#### Australia - AIIC

All the ingredients are listed or exempt.

#### SECTION 16: Any other relevant information

Training advice	Read and follow manufacturer's recommendations. Only trained personnel should use this material.
Revision comments	NOTE: Lines within the margin indicate significant changes from the previous revision.
