

# SAFETY DATA SHEET

# High Flash Plus 10

According to Preparation of Safety Data Sheets for Hazardous Chemicals Code of Practice, February 2016

| SECTION 1: Identification: Pro         | oduct identifier and chemical identity  |
|--|---|
| Product identifier                     |   |
| Product name                           | High Flash Plus 10  |
| Relevant identified uses of the        | substance or mixture and uses advised against   |
| Application                            | Car maintenance product Cleaning agent.   |
| Uses advised against                   | For professional use only. This product is not recommended for any industrial, professional or consumer use other than the Identified uses above.   |
| Details of the supplier of the s       | afety data sheet  |
| Supplier                               | Autosmart Australia<br>11 Darrambal Close<br>Rathmines<br>NSW 2283<br>Australia<br>www.autosmartaustralia.com.au<br>Tel: 02 49 75 14 88 (Mon to Fri, 08:00 - 16:00 AEST) (General Information. | SECTION 2: Hazard(s) identif           | ication   |
| Classification of the substance        | e or mixture  |
| Physical hazards                       | Flam. Liq. 4 - H227   |
| Health hazards                         | Asp. Tox. 1 - H304  |
| Environmental hazards                  | Not Classified  |
| Label elements<br>Pictogram            |   |
| Signal word                            | DANGER  |

| Hazard statements        | H227 Combustible liquid.<br>H304 May be fatal if swallowed and enters airways.   |
|--------------------------|--|
| Precautionary statements | <ul> <li>P210 Keep away from heat/ sparks/ open flames/ hot surfaces No smoking.</li> <li>P280 Wear protective gloves/ protective clothing/ eye protection/ face protection.</li> <li>P301+P310 IF SWALLOWED: Immediately call a POISON CENTER or doctor/ physician.</li> <li>P331 Do NOT induce vomiting.</li> <li>P370+P378 In case of fire: Use foam, carbon dioxide, dry powder or water fog for extinction.</li> <li>P403+P235 Store in a well-ventilated place. Keep cool.</li> <li>P405 Store locked up.</li> <li>P501 Dispose of contents/ container in accordance with national regulations.</li> </ul> |
| Contains                 | Distillates (petroleum), hydrotreated light., Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics  |

#### Other hazards

This product does not contain any substances classified as PBT (persistent, bioaccumulative and toxic) or vPvB (very persistent and very bioaccumulative).

# SECTION 3: Composition and information on ingredients

# Mixtures

# Distillates (petroleum), hydrotreated light.

CAS number: 64742-47-8

# Classification

Flam. Liq. 4 - H227 Asp. Tox. 1 - H304

# Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics

CAS number: 64742-48-9

# Classification

Flam. Liq. 3 - H226 STOT SE 3 - H336 Asp. Tox. 1 - H304

# XYLENE

CAS number: 1330-20-7

Substance with a Community workplace exposure limit.

# Classification

Flam. Liq. 3 - H226 Acute Tox. 4 - H312 Acute Tox. 4 - H332 Skin Irrit. 2 - H315

The full text for all hazard statements is displayed in Section 16.

SECTION 4: First aid measures

Description of first aid measures

5<10%

60-100%

0.2<0.5%

| General information                                   | Get medical attention immediately. Show this Safety Data Sheet to the medical personnel.   |  |
|---|--|--|
| Inhalation  | Remove affected person from source of contamination. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. Maintain an open airway. Loosen tight clothing such as collar, tie or belt. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen. Place unconscious person on their side in the recovery position and ensure breathing can take place.   |  |
| Ingestion   | Rinse mouth thoroughly with water. Remove any dentures. Give a few small glasses of water<br>or milk to drink. Stop if the affected person feels sick as vomiting may be dangerous. Do not<br>induce vomiting unless under the direction of medical personnel. If vomiting occurs, the head<br>should be kept low so that vomit does not enter the lungs. Never give anything by mouth to an<br>unconscious person. Move affected person to fresh air and keep warm and at rest in a<br>position comfortable for breathing. Place unconscious person on their side in the recovery<br>position and ensure breathing can take place. Maintain an open airway. Loosen tight clothing<br>such as collar, tie or belt. |  |
| Skin Contact  | Rinse with water.  |  |
| Eye contact   | Rinse immediately with plenty of water. Remove any contact lenses and open eyelids wide apart. Continue to rinse for at least 10 minutes.  |  |
| Protection of first aiders                            | First aid personnel should wear appropriate protective equipment during any rescue. If it is suspected that volatile contaminants are still present around the affected person, first aid personnel should wear an appropriate respirator or self-contained breathing apparatus. Wash contaminated clothing thoroughly with water before removing it from the affected person, or wear gloves. It may be dangerous for first aid personnel to carry out mouth-to-mouth resuscitation.  |  |
| Most important symptoms and                           | effects, both acute and delayed  |  |
| General information                                   | See Section 11 for additional information on health hazards. The severity of the symptoms described will vary dependent on the concentration and the length of exposure.   |  |
| Inhalation  | Prolonged inhalation of high concentrations may damage respiratory system.   |  |
| Ingestion   | Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation. Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.   |  |
| Skin contact  | Prolonged contact may cause dryness of the skin.   |  |
| Eye contact   | May cause temporary eye irritation.  |  |
| Indication of any immediate m                         | edical attention and special treatment needed  |  |
| Notes for the doctor                                  | Treat symptomatically.   |  |
| SECTION 5: Firefighting measures                      |  |  |
| Extinguishing media                                   |  |  |
| Suitable extinguishing media                          | The product is not flammable. Extinguish with alcohol-resistant foam, carbon dioxide, dry powder or water fog. Use fire-extinguishing media suitable for the surrounding fire.   |  |
| Unsuitable extinguishing media                        | Do not use water jet as an extinguisher, as this will spread the fire.   |  |
| Special hazards arising from the substance or mixture |  |  |
| Specific hazards                                      | Containers can burst violently or explode when heated, due to excessive pressure build-up.   |  |
| Hazardous combustion<br>products                      | Thermal decomposition or combustion products may include the following substances:<br>Harmful gases or vapours.  |  |
|   |  |  |

# Advice for firefightersProtective actions during<br/>firefightingAvoid breathing fire gases or vapours. Evacuate area. Cool containers exposed to heat with<br/>water spray and remove them from the fire area if it can be done without risk. Cool containers<br/>exposed to flames with water until well after the fire is out. If a leak or spill has not ignited, use<br/>water spray to disperse vapours and protect men stopping the leak. Control run-off water by<br/>containing and keeping it out of sewers and watercourses. If risk of water pollution occurs,<br/>notify appropriate authorities.Special protective equipment<br/>for firefightersWear positive-pressure self-contained breathing apparatus (SCBA) and appropriate protective<br/>clothing. Firefighter's clothing conforming to Australia/New Zealand Standards AS/NZS 4967<br/>(for clothing) AS/NZS 1801 (for helmets), AS/NZS 4821 (for protective boots), AS/NZS 1801<br/>(for protective gloves) will provide a basic level of protection for chemical incidents.

#### SECTION 6: Accidental release measures

#### Personal precautions, protective equipment and emergency procedures

Personal precautions No action shall be taken without appropriate training or involving any personal risk. Keep unnecessary and unprotected personnel away from the spillage. Wear protective clothing as described in Section 8 of this safety data sheet. Follow precautions for safe handling described in this safety data sheet. Wash thoroughly after dealing with a spillage. Ensure procedures and training for emergency decontamination and disposal are in place. Do not touch or walk into spilled material.

#### **Environmental precautions**

**Environmental precautions** Immiscible with water. Aquatic toxicity is unlikely to occur. However, large or frequent spills may have hazardous effects on the environment. Absorb spillage with non-combustible, absorbent material. Large Spillages: Inform the relevant authorities if environmental pollution occurs (sewers, waterways, soil or air).

Methods and material for containment and cleaning up

| Methods for cleaning up     | Wear protective clothing as described in Section 8 of this safety data sheet. Clear up spills<br>immediately and dispose of waste safely. Approach the spillage from upwind. Small Spillages:<br>If the product is soluble in water, dilute the spillage with water and mop it up. Alternatively, or<br>if it is not water-soluble, absorb the spillage with an inert, dry material and place it in a suitable<br>waste disposal container. Large Spillages: If leakage cannot be stopped, evacuate area.<br>Flush spilled material into an effluent treatment plant, or proceed as follows. Contain and<br>absorb spillage with sand, earth or other non-combustible material. Place waste in labelled,<br>sealed containers. Clean contaminated objects and areas thoroughly, observing<br>environmental regulations. The contaminated absorbent may pose the same hazard as the<br>spilled material. Flush contaminated area with plenty of water. Wash thoroughly after dealing<br>with a spillage. Dispose of waste to licensed waste disposal site in accordance with the<br>requirements of the local Waste Disposal Authority. |
|-----------------------------|--|
| Reference to other sections |  |
| Reference to other sections | For personal protection, see Section 8, See Section 11 for additional information on health  |

hazards. See Section 12 for additional information on ecological hazards. For waste disposal,

# SECTION 7: Handling and storage, including how the chemical may be safely used

see Section 13.

Precautions for safe handling

| Usage precautions  | Read and follow manufacturer's recommendations. Wear protective clothing as described in<br>Section 8 of this safety data sheet. Keep away from food, drink and animal feeding stuffs.<br>Handle all packages and containers carefully to minimise spills. Keep container tightly sealed<br>when not in use. Avoid the formation of mists. Do not handle until all safety precautions have<br>been read and understood. Do not handle broken packages without protective equipment. Do<br>not reuse empty containers. |  |
|--|---|--|
| Advice on general occupational hygiene                       | Wash promptly if skin becomes contaminated. Take off contaminated clothing and wash before reuse. Wash contaminated clothing before reuse. Do not eat, drink or smoke when using this product. Wash at the end of each work shift and before eating, smoking and using the toilet. Change work clothing daily before leaving workplace.   |  |
| Conditions for safe storage, including any incompatibilities |   |  |
| Storage precautions  | Store away from incompatible materials (see Section 10). Store in accordance with local regulations. Keep only in the original container. Keep container tightly closed, in a cool, well ventilated place. Keep containers upright. Protect containers from damage. Bund storage facilities to prevent soil and water pollution in the event of spillage. The storage area floor should be leak-tight, jointless and not absorbent.   |  |
| Storage class  | Chemical storage.   |  |
| Specific end use(s)  |   |  |
| Specific end use(s)  | The identified uses for this product are detailed in Section 1.   |  |
|  | le and nemeral protoction   |  |

# SECTION 8: Exposure controls and personal protection

| Control parameters            |  |
|-------------------------------|--|
| Occupational exposure limits  |  |
| XYLENE                        |  |
| Long-term exposure limit (8-b |  |

Long-term exposure limit (8-hour TWA): NOHSC 80 ppm 350 mg/m<sup>3</sup> Short-term exposure limit (15-minute): NOHSC 150 ppm 655 mg/m<sup>3</sup> NOHSC = The National Occupational Health and Safety Commission.

#### Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics (CAS: 64742-48-9)

Ingredient comments

No exposure limits known for ingredient(s).

#### Exposure controls

#### Protective equipment

| Appropriate engineering | Provide adequate ventilation. Personal, workplace environment or biological monitoring may     |
|-------------------------|--|
| controls                | be required to determine the effectiveness of the ventilation or other control measures and/or |
|                         | the necessity to use respiratory protective equipment. Use process enclosures, local exhaust   |
|                         | ventilation or other engineering controls as the primary means to minimise worker exposure.    |
|                         | Personal protective equipment should only be used if worker exposure cannot be controlled      |
|                         | adequately by the engineering control measures. Ensure control measures are regularly          |
|                         | inspected and maintained. Ensure operatives are trained to minimise exposure.                  |
| Eye/face protection     | Eyewear complying with an approved standard should be worn if a risk assessment indicates      |

**Eye/face protection** Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment for eye and face protection should comply with Australia/New Zealand Standard AS/NZS 1337. Unless the assessment indicates a higher degree of protection is required, the following protection should be worn: Tight-fitting safety glasses.

| Hand protection                   | Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. To protect hands from chemicals, gloves should comply with Australia/New Zealand Standard AS/NZS 2161. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent  |
|-----------------------------------|---|
|                                   | changes are recommended.  |
| Other skin and body<br>protection | Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.   |
| Hygiene measures                  | Provide eyewash station and safety shower. Contaminated work clothing should not be<br>allowed out of the workplace. Wash contaminated clothing before reuse. Clean equipment<br>and the work area every day. Good personal hygiene procedures should be implemented.<br>Wash at the end of each work shift and before eating, smoking and using the toilet. When<br>using do not eat, drink or smoke. Preventive industrial medical examinations should be carried<br>out. Warn cleaning personnel of any hazardous properties of the product.   |
| Respiratory protection            | Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and complies with Australia/New Zealand Standard AS/NZS 1716. Check that the respirator fits tightly and the filter is changed regularly. Gas and combination filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Full face mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Half mask and quarter mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. Half mask and quarter mask respirators with replaceable filter cartridges should comply with Australia/New Zealand Standard AS/NZS 1716. |
| Environmental exposure controls   | Store in a demarcated bunded area to prevent release to drains and/or watercourses.   |

# SECTION 9: Physical and chemical properties

| Information on basic physical and chemical properties |  |
|---|--|
| Appearance  | Clear liquid.  |
| Colour  | Clear.   |
| Odour   | Hydrocarbons.  |
| pН  | Not applicable.  |
| Flash point   | ~ 64°C Closed cup.   |
| Comments  | Information declared as "Not available" or "Not applicable" is not considered to be relevant to the implementation of the proper control measures. |
|   |  |
| Other information                                     | None.  |
| Other information<br>SECTION 10: Stability and re     |  |
|   |  |
| SECTION 10: Stability and re                          | activity   |

| Conditions to avoid                 | Avoid excessive heat for prolonged periods of time. Containers can burst violently or explode when heated, due to excessive pressure build-up.                       |
|-------------------------------------|--|
| Materials to avoid                  | No specific material or group of materials is likely to react with the product to produce a hazardous situation.   |
| Hazardous decomposition<br>products | Does not decompose when used and stored as recommended. Thermal decomposition or combustion products may include the following substances: Harmful gases or vapours. |

# SECTION 11: Toxicological information

| Information on toxicological eff       | <u>iects</u>   |
|--|--|
| Acute toxicity - oral                  |  |
| Notes (oral LD <sub>50</sub> )         | Based on available data the classification criteria are not met.   |
| Acute toxicity - dermal                |  |
| Notes (dermal LD₅₀)                    | Based on available data the classification criteria are not met.   |
| Acute toxicity - inhalation            |  |
| Notes (inhalation LC₅₀)                | Based on available data the classification criteria are not met.   |
| Skin corrosion/irritation              |  |
| Animal data                            | Based on available data the classification criteria are not met.   |
| Serious eye damage/irritation          |  |
| Serious eye damage/irritation          | Based on available data the classification criteria are not met.   |
| Respiratory sensitisation              |  |
| Respiratory sensitisation              | Based on available data the classification criteria are not met.   |
| Skin sensitisation                     |  |
| Skin sensitisation                     | Based on available data the classification criteria are not met.   |
| Germ cell mutagenicity                 |  |
| Genotoxicity - in vitro                | Based on available data the classification criteria are not met.   |
| Carcinogenicity                        |  |
| Carcinogenicity                        | Based on available data the classification criteria are not met.   |
| IARC carcinogenicity                   | Contains a substance which may be potentially carcinogenic. IARC Group 2B Possibly carcinogenic to humans. |
| Reproductive toxicity                  |  |
| Reproductive toxicity - fertility      | Based on available data the classification criteria are not met.   |
| Reproductive toxicity -<br>development | Based on available data the classification criteria are not met.   |
| Specific target organ toxicity -       |  |
| STOT - single exposure                 | Not classified as a specific target organ toxicant after a single exposure.                                |
| Specific target organ toxicity -       | repeated exposure  |
| STOT - repeated exposure               | Not classified as a specific target organ toxicant after repeated exposure.                                |
| Aspiration hazard                      |  |
| Aspiration hazard                      | Asp. Tox. 1 - H304 May be fatal if swallowed and enters airways. Pneumonia may be the                      |
|  | result if vomited material containing solvents reaches the lungs.  |

| General information | The severity of the symptoms described will vary dependent on the concentration and the length of exposure.  |
|---------------------|--|
| Inhalation          | Prolonged inhalation of high concentrations may damage respiratory system.   |
| Ingestion           | Gastrointestinal symptoms, including upset stomach. Fumes from the stomach contents may be inhaled, resulting in the same symptoms as inhalation. Aspiration hazard if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis. |
| Skin Contact        | Prolonged contact may cause dryness of the skin.   |
| Eye contact         | May cause temporary eye irritation.  |
| Route of exposure   | Ingestion Inhalation Skin and/or eye contact   |
| Target Organs       | No specific target organs known.   |

# Toxicological information on ingredients.

Distillates (petroleum), hydrotreated light.

| Acute toxicity - oral                              |  |  |
|--|--|--|
| Acute toxicity oral (LD₅₀<br>mg/kg)                | 5,000.0  |  |
| Species  | Rat  |  |
| Acute toxicity - dermal                            |  |  |
| Acute toxicity dermal (LD₅₀<br>mg/kg)              | 2,000.0  |  |
| Species  | Rabbit   |  |
| Skin corrosion/irritation                          |  |  |
| Animal data  | Erythema/eschar score: No erythema (0). Oedema score: No oedema (0). Not irritating. |  |
| Human skin model test                              | Not available.   |  |
| Serious eye damage/irritation                      |  |  |
| Serious eye<br>damage/irritation                   | Not irritating.  |  |
| Respiratory sensitisation                          |  |  |
| Respiratory sensitisation                          | There is no evidence that the material can lead to respiratory hypersensitivity.     |  |
| Skin sensitisation                                 |  |  |
| Skin sensitisation                                 | Buehler test: - Guinea pig: Not sensitising.   |  |
| Germ cell mutagenicity                             |  |  |
| Genotoxicity - in vitro                            | : Negative. This substance has no evidence of mutagenic properties.                  |  |
| Genotoxicity - in vivo                             | : Negative. This substance has no evidence of mutagenic properties.                  |  |
| Carcinogenicity                                    |  |  |
| Carcinogenicity                                    | There is no evidence that the product can cause cancer.                              |  |
| Specific target organ toxicity - repeated exposure |  |  |
|  |  |  |

STOT - repeated exposure NOAEL 750 mg/kg, Oral, Rat

| Inhalation       | No specific health hazards known.   |
|------------------|---|
| Ingestion        | Harmful: may cause lung damage if swallowed. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis. |
| Skin Contact     | No specific health hazards known.   |
| Eye contact      | No specific health hazards known.   |
| Medical Symptoms | Skin irritation.  |

| Other adverse effects                  |  |  |  |
| Other adverse effects                  | None known.  |  |  |
| SECTION 13: Disposal consider          | rations  |  |  |
| Waste treatment methods                |  |  |  |
|  | The generation of waste should be minimised or avoided wherever possible. Reuse or recycle products wherever possible. This material and its container must be disposed of in a safe way. Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. When handling waste, the safety precautions applying to handling of the product should be considered. Care should be taken when handling emptied containers that have not been thoroughly cleaned or rinsed out. Empty containers or liners may retain some product residues and hence be potentially hazardous. |  |  |

# Disposal methods Do not empty into drains. Dispose of surplus products and those that cannot be recycled via a licensed waste disposal contractor. Waste, residues, empty containers, discarded work clothes and contaminated cleaning materials should be collected in designated containers, labelled with their contents. Incineration or landfill should only be considered when recycling is not feasible.

#### SECTION 14: Transport information

#### General

The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADG).

#### UN number

Not applicable.

# UN proper shipping name

Not applicable.

#### Transport hazard class(es)

No transport warning sign required.

# Packing group

Not applicable.

#### Environmental hazards

Environmentally hazardous substance/marine pollutant No.

# Special precautions for user

Not applicable.

Transport in bulk according to Not applicable. Annex II of MARPOL 73/78 and the IBC Code

#### SECTION 15: Regulatory information

# Safety, health and environmental regulations/legislation specific for the substance or mixture

Schedule (SUSMP)

Schedule 5. Caution.

#### Inventories

Australia - AICS All the ingredients are listed or exempt.
