

SAFETY DATA SHEET

Clear View

SECTION 1: IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

1.1. Product identifier

Trade name: Clear View Product no.: MBCVRTU

1.2. Relevant identified uses of the substance or mixture and uses advised against

Relevant identified uses of the substance or

mixture:

Restricted to professional users.

Uses advised against: For professional use only. This product is not recommended for any

industrial, professional or consumer use other than the identified

uses above

Cleaning product

1.3. Details of the supplier of the safety data sheet

Company and address: Autosmart Australia

11 Darrambal Close NSW 2283 Rathmines

Australia

Tel: 02 49 75 14 88 (Mon to Fri, 08:00 - 16:00 AEST)

autosmart@autosmartaustralia.com.au

Contact person: Russell Butler

E-mail: SHREQ@autosmart.co.uk

 SDS date:
 10/3/2025

 SDS Version:
 1.0

1.4. Emergency telephone number

In an Emergency call 000

NCEC - For Chemical Emergency Support ONLY (spill, leak, fire, exposure or accident), Call NCEC at 1800 074 234 (toll free 24Hrs) - when calling please quote "AUTOSMART 29003-NCEC"

Local number +61 (0)2 8 014 4558

General Information. Transport Information. Mild medical Information:-Autosmart Australia, Tel: 02 49 75 14 88 (Mon to Fri, 08:00 - 16:00 AEST)

National Emergency Telephone Number:

In less severe situations call the Poisons Information Centre / Poison Information Hotline: 13 11 26 (Available 24/7 from anywhere is Australia)

SECTION 2: HAZARDS IDENTIFICATION

This material is considered hazardous according to the Work Health and Safety Regulations.

2.1. Classification of the substance or mixture

STOT SE 2; H371, May cause damage to organs.

2.2. Label elements

Hazard pictogram(s):

Signal word: Warning

Hazard statement(s): May cause damage to organs. (H371)

Precautionary statement(s):

General:

Prevention: Do not breathe vapour/mist. (P260)

Wash hands and exposed skin thoroughly after handling. (P264)

Response: IF exposed or concerned: Call a POISON CENTER/doctor (P308+P311)

Storage: -

Disposal: Dispose of contents/container in accordance with local regulation

(P501)

Hazardous substances: methanol
Additional labelling: Not applicable.

2.3. Other hazards

SECTION 3: COMPOSITION/INFORMATION ON INGREDIENTS

3.1. Substances

Not applicable. This product is a mixture.

3.2. Mixtures

Product/substance:	Identifiers:	% w/w:	Classification:	Note:
methanol	CAS No.: 67-56-1 EC No.: 200-659-6	5-10%	Flam. Liq. 2, H225 Acute Tox. 3, H301 (ATE: 300.00 mg/kg) Acute Tox. 3, H311 Acute Tox. 3, H331 STOT SE 1, H370 STOT SE 2, H371 (SCL: 3.00 %)	
ethanediol;ethylene glycol	CAS No.: 107-21-1 EC No.: 203-473-3	5-10%	Acute Tox. 4, H302 STOT SE 3, H335	

See full text of H-phrases in section 16. Occupational exposure limits are listed in section 8, if these are available.

Other information

-

SECTION 4: FIRST AID MEASURES

4.1. Description of first aid measures

General information: In the case of accident: Contact a doctor or casualty department –

bring the label or this safety data sheet.

Contact a doctor if in doubt about the injured person's condition or if the symptoms persist. Never give an unconscious person water or

other drink.

Inhalation: Upon breathing difficulties or irritation of the respiratory tract: Bring

the person into fresh air and stay with him/her.

Skin contact: Remove contaminated clothing and shoes immediately. Ensure to

wash exposed skin thoroughly with water and soap. Skin cleanser

can be used. DO NOT use solvents or thinners.

If skin irritation occurs: Get medical advice/attention.

Eye contact: If in eyes: Flush eyes with water or saline water (20-30 °C) for at least

5 minutes. Remove contact lenses. Seek medical assistance and

continue flushing during transport.

Ingestion: In the case of ingestion, contact a doctor immediately. If the person

is conscious, give them water. DO NOT try to induce vomiting unless this is recommended by a doctor. Hold head facing down to prevent vomit from returning to the mouth and throat. Prevent shock by keeping the injured person warm and calm. Initiate immediate resuscitation if breathing stops. If unconscious, roll the injured

person into recovery position. Call an ambulance.

Burns: Not applicable.

4.2. Most important symptoms and effects, both acute and delayed

None known.

4.3. Indication of any immediate medical attention and special treatment needed

IF exposed or concerned:

Get immediate medical advice/attention.

Information to medics

Bring this safety data sheet or the label from this product.

SECTION 5: FIREFIGHTING MEASURES

5.1. Extinguishing media

Not applicable.

5.2. Special hazards arising from the substance or mixture

Fire will result in dense smoke. Exposure to combustion products may harm your health. Closed containers, which are exposed to fire, should be cooled with water. Do not allow fire-extinguishing water to enter the sewage system and nearby surface waters.

If the product is exposed to high temperatures, e.g. in the event of fire, dangerous decomposition compounds are produced. These are:

Carbon oxides (CO / CO2)

5.3. Advice for firefighters

Wear self-contained breathing apparatus and protective clothing to prevent contact. Upon direct exposure call the NSW Poisons Information Centre on 13 11 26 (Available 24/7) in order to obtain further advice.

SECTION 6: ACCIDENTAL RELEASE MEASURES

6.1. Personal precautions, protective equipment and emergency procedures

Avoid direct contact with spilled substances.

Ensure adequate ventilation, especially in confined areas.

Contaminated areas may be slippery.

6.2. Environmental precautions

Avoid discharge to lakes, streams, sewers, etc. Keep unauthorized persons away from the spill

6.3. Methods and material for containment and cleaning up

Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations.

Wherever possible cleaning should be performed with normal cleaning agents. Avoid use of solvents.

6.4. Reference to other sections

See section 13 "Disposal considerations" on handling of waste.

See section 8 "Exposure controls/personal protection" for protective measures.

SECTION 7: HANDLING AND STORAGE

7.1. Precautions for safe handling

Avoid direct contact with the product.

Avoid contact during pregnancy and while nursing.

Smoking, drinking and consumption of food is not allowed in the work area.

See section 8 "Exposure controls/personal protection" for information on personal protection.

Conditions for safe storage, including any incompatibilities 7.2.

Containers that have been opened must be carefully resealed and kept upright to prevent leakage.

Recommended storage material: Keep only in original packaging.

5 - 30°C Storage conditions:

Incompatible materials: Strong acids, strong bases, strong oxidizing agents, and strong

reducing agents.

7.3. Specific end use(s)

This product should only be used for applications quoted in section 1.2.

SECTION 8: EXPOSURE CONTROLS/PERSONAL PROTECTION

8.1. **Control parameters**

methanol

Long term exposure limit (8 hours) (ppm): 200 Long term exposure limit (8 hours) (mg/m³): 262 Short term exposure limit (15 minutes) (ppm): 250 Short term exposure limit (15 minutes) (mg/m³): 328

Sk = Absorption through the skin may be a significant source of exposure.

ethanediol; ethylene glycol

Long term exposure limit (8 hours) (ppm): 20 Long term exposure limit (8 hours) (mg/m³): 10 Short term exposure limit (15 minutes) (ppm): 40 Short term exposure limit (15 minutes) (mg/m³): 104

Annotations:

Sk = Absorption through the skin may be a significant source of exposure.

2,2',2"-nitrilotriethanol

Long term exposure limit (8 hours) (mg/m³): 5

Annotations:

Sen = Respiratory and/or Skin Sensitiser.

Workplace exposure standards for airborne contaminants (Safe Work Australia).

8.2. **Exposure controls**

Compliance with the given occupational exposure limits values should be controlled on a regular basis.

General recommendations: Smoking, drinking and consumption of food is not allowed in the

work area.

Exposure scenarios: There are no exposure scenarios implemented for this product. Professional users are subjected to the legally set maximum Exposure limits:

concentrations for occupational exposure. See occupational hygiene

limit values above.

Appropriate technical measures: The formation of vapours must be kept at a minimum and below

current limit values (see above). Installation of a local exhaust system if normal air flow in the work room is not sufficient is

recommended. Ensure eyewash and emergency showers are clearly

marked.

Apply standard precautions during use of the product. Avoid

inhalation of vapours.

Hygiene measures: In between use of the product and at the end of the working day all

exposed areas of the body must be washed thoroughly. Pay special

attention to hands, forearms and face.

Measures to avoid environmental exposure: Keep damming materials near the workplace. If possible, collect

spillage during work.

Individual protection measures, such as personal protective equipment

Generally: Use only protective equipment that carries the RCM symbol.

Respiratory Equipment:

Туре:	Class:	Colour:	Standards:	:
No special when used as intended.				

Respiratory protection complying with an approved standard should be worn if a risk assessment indicates inhalation of contaminants is possible. Ensure all respiratory protective equipment is suitable for its intended use and is appropriately marked to a relevant standard. Check that the respirator fits tightly and the filter is changed regularly.

Gas and combination filter cartridges suitable for intended use, Full face mask respirators with replaceable filter cartridges suitable for intended use, half mask and quarter mask respirators with replaceable filter cartridges suitable for intended use, can all be used.

Skin protection:

Recommended:	Type/Category:	Standards:	:
No special when used as intended.	-	-	

Appropriate footwear and additional protective clothing complying with an approved standard should be worn if a risk assessment indicates skin contamination is possible.

Hand protection:

Material:	Glove thickness (mm):	Breakthrough time (min.):	Standards:	:
Nitrile	0,2	> 30	EN374-2, EN374-3, EN388	

Chemical-resistant, impervious gloves complying with an approved standard should be worn if a risk assessment indicates skin contact is possible. The most suitable glove should be chosen in consultation with the glove supplier/manufacturer, who can provide information about the breakthrough time of the glove material. The breakthrough time for any glove material may be different for different glove manufacturers. To protect hands from chemicals, wear gloves that are proven to be impervious to the chemical and resist degradation. Considering the data specified by the glove manufacturer, check during use that the gloves are retaining their protective properties and change them as soon as any deterioration is detected. Frequent changes are recommended. The choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. When used with mixtures, the protection time of gloves cannot be accurately estimated. Gloves made from the following material may provide suitable chemical protection: Nitrile rubber. Thickness: > 0.2 mm The selected gloves should have a breakthrough time of at least 2 hours. Glove thickness is not necessarily a good measure of glove resistance as the permeation rate will depend on the exact glove composition. Repeated exposure to chemicals will degrade the ability of the glove to provide resistance to chemicals. Specific work environments and material handling practices may vary, therefore safety procedures should be developed for each intended application. Use thin cotton gloves inside natural rubber gloves if there is an allergy risk to natural rubber.

Eye protection:

Type:	Standards:	:
No special when used as intended.	-	

Eyewear complying with an approved standard should be worn if a risk assessment indicates eye contact is possible. Personal protective equipment that provides appropriate eye and face protection should be worn. Wear tight-fitting, chemical splash goggles or face shield. If inhalation hazards exist, a full-face respirator may

be required instead.

SECTION 9: PHYSICAL AND CHEMICAL PROPERTIES

9.1. Information on basic physical and chemical properties

Form:

Colour: Transparent, Blue

Conforms to Code of Practice - Preparation of safety data sheets for hazardous chemicals, June 2023.

Odour: Solvent

No data available. Odour threshold (ppm):

10.1 pH: pH in solution: 8.6 (1%) Density (g/cm³): 0.991

Relative density: 0.991 (20 °C) Kinematic viscosity: No data available. Dynamic viscosity: 1 centistokes (20 °C) Particle characteristics: Does not apply to liquids.

Phase changes

Melting point/Freezing point (°C): -15

Softening point/range (°C): Does not apply to liquids.

Boiling point (°C): 100

Vapour pressure: No data available. No data available. Relative vapour density: No data available. Decomposition temperature (°C):

Data on fire and explosion hazards

Flash point (°C):

Negative results have been obtained in the sustained combustibility test L.2, Part III, section 32 of the UN RTDG, Manual of Tests and

Criteria.

Flammability (°C): The material is not combustible.

No data available. Auto-ignition temperature (°C): Explosion limits (% v/v): No data available.

Solubility

No data available. Solubility in water: n-octanol/water coefficient (LogKow): No data available. No data available. Solubility in fat (q/L):

Other information 9.2.

> VOC (g/L): 163

Other physical and chemical parameters: No data available. No data available. Oxidizing properties:

SECTION 10: STABILITY AND REACTIVITY

10.1. Reactivity

No data available.

10.2. **Chemical stability**

The product is stable under the conditions, noted in section 7 "Handling and storage".

10.3. Possibility of hazardous reactions

None known.

Conditions to avoid 10.4.

None known.

Incompatible materials 10.5.

Strong acids, strong bases, strong oxidizing agents, and strong reducing agents.

Hazardous decomposition products 10.6.

Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: TOXICOLOGICAL INFORMATION

11.1. Information on toxicological effects

Acute toxicity

Product/substance methanol Species: Human Route of exposure: Oral Test: LC50 Result: 300 mg/kg

Product/substance methanol Species: Rat Route of exposure: Oral Test: LD50 >5000 mg/kg Result:

Product/substance methanol Rabbit Species: Route of exposure: Dermal Test: LD50

Result: 15800 mg/kg

Product/substance methanol Species: Rat Route of exposure: Inhalation

Test: LC50 (4 hours) Result: 3 mg/L

Product/substance ethanediol;ethylene glycol

Species: Rat Route of exposure: Dermal Test: LD50 Result: 4000 mg/kg

Product/substance ethanediol;ethylene glycol

Species: Rat Route of exposure: Dermal Test: LD50 Result: 10600 mg/kg

Product/substance 2,2',2"-nitrilotriethanol

Species: Rat Route of exposure: Oral Test: LD50 6400 mg/kg Result:

2,2',2"-nitrilotriethanol Product/substance

Species: Rabbit Route of exposure: Dermal Test: LD50

> 2000 mg/kg Result:

Skin corrosion/irritation

Based on available data, the classification criteria are not met.

Serious eye damage/irritation

Based on available data, the classification criteria are not met.

Respiratory sensitisation

Based on available data, the classification criteria are not met.

Skin sensitisation

Based on available data, the classification criteria are not met.

Germ cell mutagenicity

Based on available data, the classification criteria are not met.

Carcinogenicity

Based on available data, the classification criteria are not met.

2,2',2"-nitrilotriethanol has been classified by IARC as a group 3 carcinogen.

Reproductive toxicity

Based on available data, the classification criteria are not met.

STOT-single exposure

May cause damage to organs.

STOT-repeated exposure

Based on available data, the classification criteria are not met.

Aspiration hazard

Based on available data, the classification criteria are not met.

Long term effects

None known.

SECTION 12: ECOLOGICAL INFORMATION

12.1. Toxicity

No data available.

12.2. Persistence and degradability

Based on available data, the classification criteria are not met.

12.3. Bioaccumulative potential

Based on available data, the classification criteria are not met.

12.4. Mobility in soil

No data available.

12.5. Results of PBT and vPvB assessment

This mixture/product does not contain any substances known to fulfil the criteria for PBT and vPvB classification.

12.6. Other adverse effects

None known.

SECTION 13: DISPOSAL CONSIDERATIONS

Waste treatment methods

Dispose of contents/container to an approved waste disposal plant.

Specific labelling

Contaminated packing

Packaging containing residues of the product must be disposed of similarly to the product.

SECTION 14: TRANSPORT INFORMATION

:		14.2 UN proper shipping name:			Env**:	Other informatio n::
ADG	-	-	-	-	-	-
IMDG	-	-	-	-	-	-
IATA	-	-	-	-	-	-

^{*} Packing group

Additional information

Negative results have been obtained in the sustained combustibility test L.2, Part III, section 32 of the UN RTDG, Manual of Tests and Criteria.

14.6. Special precautions for user

Not applicable.

14.7. Transport in bulk according to Annex II of Marpol and the IBC Code

No data available.

SECTION 15: REGULATORY INFORMATION

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

Restrictions for application: Restricted to professional users.

People under the age of 18 shall not be exposed to this product. Pregnant women and women breastfeeding must not be exposed to this product. The risk, and possible technical precautions or design of the workplace needed to eliminate exposure, must be considered.

Demands for specific education: No specific requirements.

Control of major hazard facilities:

Additional information:

Not applicable.

Not applicable.

The Australian Inventory of Industrial

methanol is listed

Chemicals (AIIC): ethanediol;ethylene glycol is listed 2,2',2"-nitrilotriethanol is listed

SUSMP: Schedule 6. Poisons.

Sources: Model Work Health and Safety Regulations as at 1 January 2021.

15.2. Chemical safety assessment

Nο

SECTION 16: OTHER INFORMATION

Full text of H-phrases as mentioned in section 3

H225, Highly flammable liquid and vapour.

H301, Toxic if swallowed.

H302, Harmful if swallowed.

H311, Toxic in contact with skin.

H331, Toxic if inhaled.

H335, May cause respiratory irritation.

H370, Causes damage to organs.

H371, May cause damage to organs.

The full text of identified uses as mentioned in section 1

None known.

Abbreviations and acronyms

ADG = The Australian Code for the Transport of Dangerous Goods by Road & Rail

AICIS = Australian Industrial Chemicals Introduction Scheme

^{**} Environmental hazards

AIIC = Australian Inventory of Industrial Chemicals

AS = Australian Standard

AS/NZS = Australian New Zealand Standard

ATE = Acute Toxicity Estimate

AUH = Hazard statements specific for Australia

BCF = Bioconcentration Factor

CAS = Chemical Abstracts Service

EINECS = European Inventory of Existing Commercial chemical Substances

GHS = Globally Harmonized System of Classification and Labelling of Chemicals

Hazchem = Hazardous chemicals

IARC = International Agency for Research on Cancer

IATA = International Air Transport Association

IMDG = International Maritime Dangerous Goods

LogPow = logarithm of the octanol/water partition coefficient

MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the

Protocol of 1978. (""Marpol"" = marine pollution)

NICNAS = National Industrial Chemicals Notification and Assessment Scheme (replaced by AICIS since 2020)

OECD = Organisation for Economic Co-operation and Development

PBT = Persistent, Bioaccumulative and Toxic

RCM = Regulatory Mark of Conformity

RID = The Regulations concerning the International Carriage of Dangerous Goods by Rail

SCL = A specific concentration limit

STEL = Short-term exposure limits

STOT-RE = Specific Target Organ Toxicity - Repeated Exposure

STOT-SE = Specific Target Organ Toxicity - Single Exposure

SUSMP = Standard for the Uniform Scheduling of Medicines and Poisons

TWA = Time weighted average

UN = United Nations

UVBC = Unknown or variable composition, complex reaction products or of biological materials

VOC = Volatile Organic Compound

vPvB = Very Persistent and Very Bioaccumulative

WHS = Work Health and Safety Regulations

Additional information

The classification of the mixture in regard of health hazards is in accordance with the calculation methods given by the Work Health and Safety Regulations.

Refer to AS 1940–2017: The storage and handling of flammable and combustible liquids.

The safety data sheet is validated by

Adrian

Other

A change (in proportion to the last essential change (first cipher in SDS version, see section 1)) is marked with a triangle.

The information in this safety data sheet applies only to this specific product (mentioned in section 1) and is not necessarily correct for use with other chemicals/products.

It is recommended to hand over this safety data sheet to the actual user of the product. Information in this safety data sheet cannot be used as a product specification.

Country-language: AU-en
